4. Customer Segmentation Overview

Customer Segment	Customers	Customer Share	Total Spend	Transactions	Avg Breadth
Low Value	4,307	73.1%	\$1.80B	187,541	8.2
High Value Loyal	1,367	23.2%	\$3.05B	337,085	14.0
Frequent Buyer	111	1.9%	\$0.11B	14,514	11.4
High Value	106	1.8%	\$0.13B	10,928	10.6

High Value Loyal customers represent 1,367 customers (23.2% of the base) but contribute **59.9%** of customer-level spend and **61.3%** of transactions. Low Value customers form 73.1% of the customer base.

5. Marketing Insights by Customer Profile

Dimension	Segment	Customers	Share	Observation
City category	C	3,139	53.3%	Largest customer base
City category	B	1,707	29.0%	Second-largest base
Age group	26–35	2,053	34.8%	Largest customer cohort
Gender	M	4,225	71.7%	Majority customer base

6. Action-Oriented Business Implications

Priority	Business implication
Retain high-value loyal customers	High Value Loyal has the highest average category breadth (14.0) and generates 59.9% of customer-level spend. Use loyalty rewards, cross-sell offers and early-access campaigns.
Develop the low-value pool	Low Value customers are 73.1% of the base. Test bundles, personalized recommendations and repeat-purchase incentives to increase engagement.
Target core customer cohorts	Age 26–35 is the largest customer cohort (2,053 customers), while City Category C has the largest customer base (3,139). Use these segments for campaign testing.
Balance acquisition with retention	Track customer movement between segments alongside product/category concentration so marketing activity is linked to measurable changes in value and engagement.

7. Data & Methodology Notes

Executive source: **Black Friday Data_clean_2.csv** (550,068 transaction records). Marketing source: **customer_analysis(2).csv** (5,891 customer-level records). Executive sales metrics use Purchase. Marketing metrics use the supplied Total_Spend, Transactions, Avg_Purchase, CLV_Proxy, Category_Breadth and Customer_Segment fields. Customer_Segment is treated as the segmentation supplied in the analysis file. Values are rounded for presentation.

Report purpose: concise management view of sales performance and customer behaviour for campaign planning, retention, cross-selling and product/category monitoring.
